3rd parties analytics	2

Information that we collect

- Your email address. We use it to identify you in our systems. It is stored in our database.
- Hashed value of your password. We use it to verify you in our systems. It is stored in our database.
- Your two factor authentication key (if applicable). We use it to verify you in our systems. It is stored in our database.
- Your testing devices hardware identifiers. It is stored in our database. We use it to determine how our systems should behave during your testing of our APIs and features.
- Your apps binary packages (IPA files). We store them on our servers' hard discs. They are stored privately and available only for your account, unless attached to a published app object.
- Your app metadata. It is stored in our database. It is stored privately unless you publish your app on the Store.
- Cookies and LocalStorage. We use cookies and LocalStorage to identify you or/and browser. Cookies are stored on your device/browser, and we will clear them if you will unlink your device.
- Your Name, Address, Download/Purchase history - it is stored in our database and kept unless you will request us to delete this information.
- Your company or/and identity details. We use it to verify your identity and establish legal binding with you. It is stored in our database.
- Your copyright claims and their outcomes. This information is stored in our database and shared publicly (except your private information, if you will request us to hide it), as we are a transparent company.

Information sharing policy

We never share any private information with any parties, unless you approve sharing or it is required by laws of the Republic of Estonia or defined above.

Your right to request information about you

According to GDPR, you can request all information that is stored about you with us. Please email us to contact@dbservices.to and we will process your request within 7 business days.

3rd parties analytics

Our platform can contain scripts or/and pixels of 3rd party analytics tools like Google AdSense, Facebook, Twitter, Telegram. Please refer to Privacy Policies of 3rd parties in order to know how they use, store, share and delete your data.
